OVERVIEW

In Equalizer, the option to beautify your portal is endless. With Equalizer, even users that are not equipped with web programming language can easily edited the site layout arrangement, adding new portlet or even changing the background colour of the portal can be done in a flash.

Below are the steps for some of the most common changes that can be done in Equalizer. Users need to **log in** as **System Administrator** to administer all the steps listed in this operational guide.

Before users can proceed, users need to understand the meaning of portlet as Equalizer consisted of either a single portlet or combinations of portlets in a single web page. In Equalizer, a **portlet** is also known as **Web Content Display / Paparan Kandungan Web.**

ADD & EDIT WEB CONTENT DISPLAY / PORTLET

Understanding **Portlet / Paparan Kandungan Web**: a Web-based component that will process requests and generate dynamic content. The end-user would essentially see a portlet as being a specialized content area within a Web page that occupies a small window in the portal page. The portlet provides users with the capability to customize the content, appearance and position of the portlet.

 Click on Add drop down option – Paparan Kandungan Web (under Application).

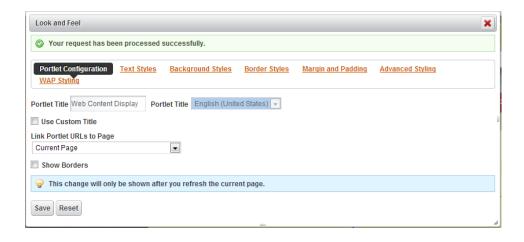

2. To edit the properties of the newly added Paparan Kandungan Web, click on the icon below;

3. From the dropdown option, select **Look and Feel.**

- 4. From the dropdown option, select **Look and Feel**. The display below will be displayed. There are a few options that can be changed under the function of 'Look and Feel'.
- 5. Users can change the Text Styles, Background Styles, Border Styles, Margin and Padding aside from the Portlet Configuration standard option. For more advanced users, there are also Advanced Styling and WAP Styling.

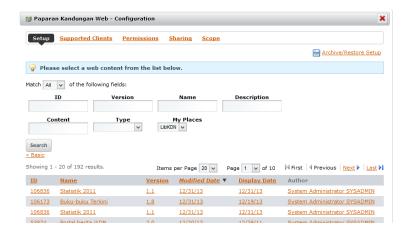

- 6. To change the background color, click on **Background Styles** link. Users can either type the color code eg.; #d9d9d9 or user can use the color picker to select the desired color.
- 7. Click button **Save** once done with color selection.

8. The changes will be applied accordingly. To add in items into the Web Content Display, click onto **Select Web Content** icon

 To add Menu item into the portlet, click Setup when the Web Content Display menu popped up. Fill in the ID of the navigation menu (14021) – Click Search.

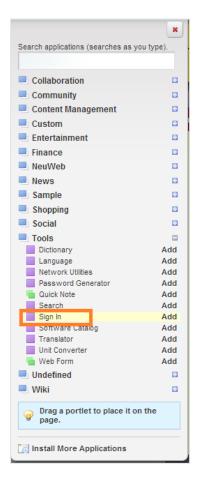

10.Click button Save.

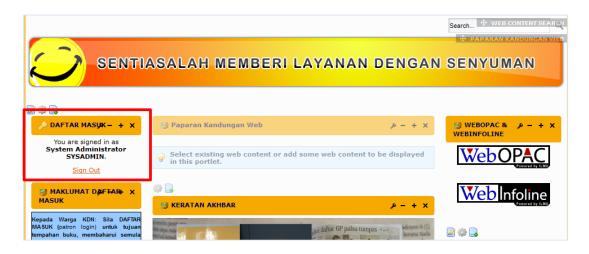

ADD SIGN IN

Aside from the Navigation menu as per above steps, users can also added in **Sign In**/ Log In option to a portlet / Paparan Kandungan Web. To add in Sign In option to the portal, follow the steps below;

 Click Add – Tools – Sign In. Click the link Add to add in the portlet option into the portal.

2. The output will be as below;

ADD WEB OPAC

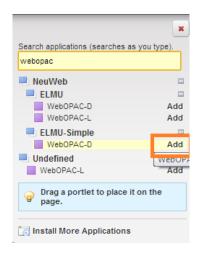

With Equalizer, some of ILMU functionally had already been portletized and can be added into the portlet. Example is adding in Web Opac Search function into the portlet of the portal.

Follow the steps below;

1. Click on Add - More

The list will expand more and show a list of ELMU portlet option. Choose **ELMU**
 Simple (this option will only display a Search option) – Click **Add** to add in the portlet into the page

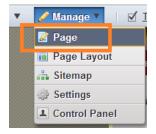

3. WebOPAC portlet will be inserted into the page.

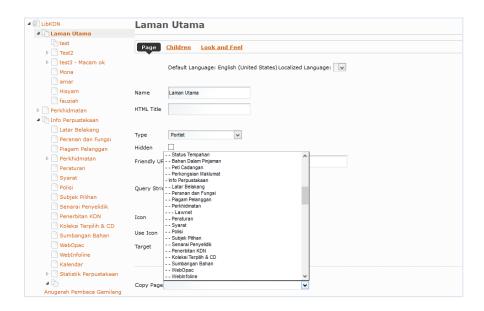

COPY PAGE

Understanding Copy Page: It's function allow users to duplicate / replace a page easily along with all it's content inclusive of its navigation menu (if available). To do a 'copy page', follow the steps below;

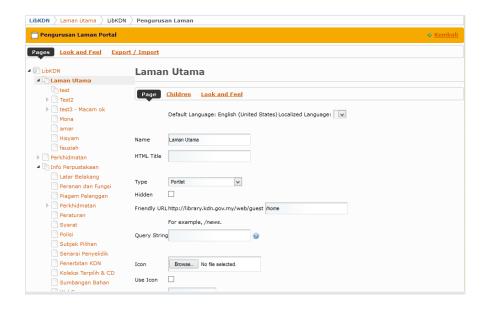

- 1. Open the page that needed to be 'replaced' (also known as target page).
- 2. Go to Manage Page

3. The page below will be displayed. From the **Copy Page** dropdown option, select the **Source** / page to be copied from.

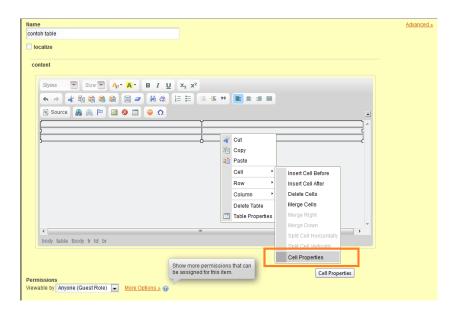

- 4. Click Save to finalize the selection.
- 5. Click Return to Full Page to return back to the updated page.

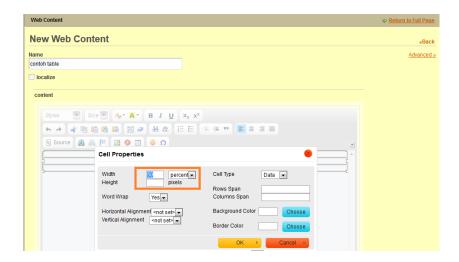

CREATE TABLE

A Paparan Kandungan Web not only can added a pre-portletized menu, it can also included a table into users's portal page. To add a table into the page, simply follow the steps below;

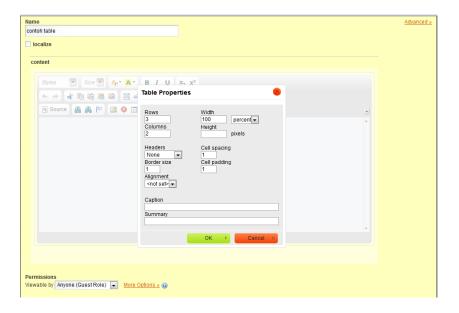

- 1. Click on 📓 icon from the portal page. The below display will appeared.
- 2. Click from the menu click on **Table** icon . A table can be edited by right clicking the table and select either **Cell**, **Row**, **Column** or **Table Properties**.
- 3. A **Cell** dropdown contains the options in the figure below;

4. To define the properties of a cell, click on **Cell Properties**. Thus, a cell can be customized according to users' taste. Once done, click **OK**.

5. With a **Table Properties**, users can define the total number of **Rows** and **Columns** to be added to the table. Users may also define the **Header** and assortments of other options. Once done, click **OK**.

PADDING

Understanding Padding: The distance between the portlets borders and the content within it. Padding is usually used to create a more desirable display.

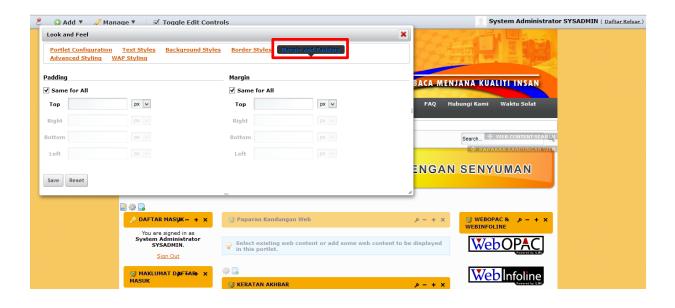

- Click on Add drop down option Paparan Kandungan Web (under Application).
- 2. To edit the properties of the newly added Web Content Display, click on the icon below;

3. From the dropdown option, select Look and Feel.

4. From Look and Feel – click Margin and Padding. Change the Padding Properties as required.

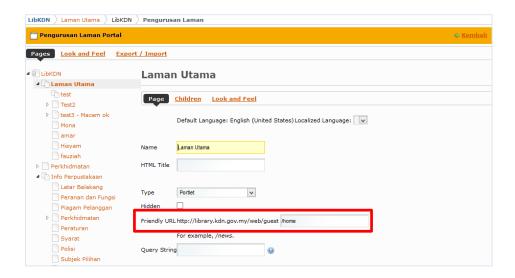

CHANGING THE PAGE 'FRIENDLY URL'

Understanding 'Friendly URL': URL that were used as a referral in a hyperlink to 'call/redirect' a certain page.

1. Click Manage - Page

- 1. From Page option, go to Friendly URL fill in the designated name
- 2. Click Save

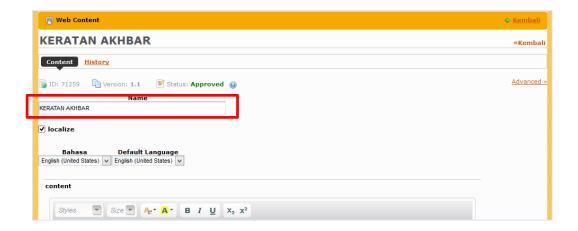

CHANGE TITLE NAME

1. The **title** of the portal page can be change via the Paparan Kandungan Web option. Click on icon.

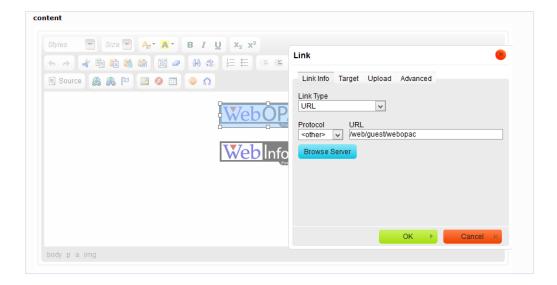

- 2. From the **Content** display, edit the **Name** column Click button **Save**.
- 3. The name of the page will be changed accordingly to the changes that have been made.

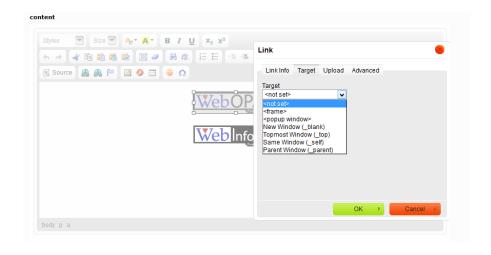

CREATE LINKS VIA IMAGE / WORDS

Hyperlinks can be created via clicking on words or by clicking on image. To create a hyperlink via an image or words, follow the steps below;

- Click on icon. To add an image into the content area, click on and Browse for desired image press OK.
- 2. Highlights the words/sentence that needed to be converted into link. For image; to make the image 'linkable', click on la icon.
- 3. Change the protocol to http:// and set the URL accordingly. Click button OK.

4. To set the new page as **separate** new window, choose the dropdown as **New Window** (as in figure below). Click **OK** when done.
